

## USA WINTER 2022 TEAM EVALUATION

City: \_\_\_\_\_

Student: \_\_\_\_\_

Partner(s): \_\_\_\_\_

Working in groups is not just a activity for college classes, most of us work in groups all our lives ... our teams, our departments, our collaborative research groups. None of us have formal instruction in how groups work because every one is unique. In our jobs, we also have to evaluate others in our groups for a variety of reasons.

As part of your grade on the USA Winter 2018 project, please evaluate the effort each of you put into the project and how you performed as a team.

- 1) What were your particular responsibilities in this project? How much effort did you put forth each week to keep up with the weather in your city?
  
- 2) What were your partner's particular responsibilities in this project? How much effort did he or she put forth each week to keep up with the weather in your city?
  
- 3) How often did you meet to work on and discuss the project? Did you each contribute evenly to the discussions? If not, explain who contributed more and why.
  
- 4) How well did you perform as a member of the team?
  
- 5) How well did your partner perform as a member of the team?
  
- 6) Asses your team's performance as a unit.
