### General Comments About the Lab:

- Lab helps clear up all questions that I have about the class.
- Maybe no lab the day of exam-- not much to cover and people are pretty unmotivated
- very effective due to small size
- Lab is a helpful addition to the time spent in the classroom with Mrs. Stipa. It is great to have someone who teaches differently than Mrs. Stipa available when confusion arises.
- A positive environment was created in the Lab starting day one and has been so up till now. It is always a pleasure to come to lab and not a hassle.

- Lab is great. There's not really anything that I can think of that would make it better. It already serves as such a useful tool for understanding the material covered in class. I love how small my lab size is too. Having a small group of people makes it easier to get through material fast and enables us to learn more in a short period of time.
- Lab assignments with the workbook were sometimes overwhelming, but it was a key study guide for tests and the TA was always willing to go above and beyond while answering questions about it. The lab was a fundamental part of my learning; having it twice a week was very helpful.

- I feel like Kevin does a really good job running lab and teaching us relevant information that clarifies what we do in class. However, I feel lab itself is pointless and doesn't help me.
